Many Sales Reported by Auto Dealers

No-Rim-Cut Tires 10% Oversize

Tire Bills Reduced 48%

Statistics show that 23% of all ruined clincher tires are rim-cut. No-Rim-Cut tires end this ruin forever.

Experience proves that 10% oversize, under average conditions, adds 25% to the tire mileage. Add these two savings—for you save them both in Goodyear No-Rim-Cut tires.

That's the advantage of this patented tire over the best of others.

Proved by 900,000 Tires

These savings are not an as-numption. Over 900,000 Good-year tires have already been tested out.

As a result, these tires far outsell any other tire that's

The demand has three times doubled in the past two years. It is now running three times last year. And 127 leading motor car makers have this year contracted for Goodyear tires.

The Coming Tire

When a tire suddenly jumps to the topmost place, after, years of comparison, it means that its claims are proved.

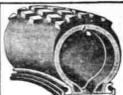

When a tire trebies its sales in a single year, after 900,000 have been tested out, it means that men want that tire.

No Extra Price

These patented tires now cost no more than other standard tires. So the saving is clear. You can get tires that can't riment — oversize tires — at the price of the old-type clinchers.

But no tires of this new type can be satisfactory without our patented features. Our Tire Book explains this fillly. If these features appeal to you, get the Goodyear No-Rim-Cut tire.

Our 1912 Tire Book—based on 13 years of tire making—is filled with facts you should know. Ask us to mail it to you.

The Strongest Car In the World

1771 the adoption of an all-chrome-nickel-steel construction and corresponding increased solidity throughout its entire make-up, the new Everitt has

throughout its citire make-up, the new Everitt has been called by experts "The strongest car in the world."

Chronie-inckel, as you probably know, is the one material used by the United States and other governments for battle-ship armor and high-powered canon. It is the use of this material—found in no other car costing less than stigned which has given the Everitt its great reputation—for the Everitt is built throughout of this wonderful chrome-nickel steel.

But this is not all. The ear's frame is of nearly double the usual strength; the wheels and tires are noticeably solid and massive: the axles are of special size; the gears are almost unbreakable, and the whole

car is a powerful piece of machinery, built to last.

The new Everitt Self-Starting Six at \$1,850 is the sensation of the year. We invite you to see it.
